IMPACT

10+ Years in tech & data, since 2016

8+ Years freelance data engineering

#1 Class rank, BSc & MSc — Great Distinction

TECHNICAL SKILLS

BI & Visualization

Power BI

DAX

SSRS

Power Query

Data Engineering

Azure Data Factory

SSIS

DBT

PySpark

Databases & SQL

SQL Server

Snowflake

Query Optimization

Cloud & Platforms

Azure Synapse

Databricks

Microsoft Fabric

Domain Expertise

Fraud Detection

Fraud Investigations

PROFILE

Senior Data Engineer and Analytics professional with 8+ years bridging data engineering and business intelligence — from requirements gathering and pipeline design to predictive modeling and executive-ready Power BI reporting. Deep expertise across the modern data stack (Python, SQL, Azure, Databricks, Snowflake, Power BI), paired with 10+ years of applied fraud analytics at Ethio Telecom. MSc in Computer Science from Bahir Dar University.

PROFESSIONAL EXPERIENCE

Senior Data Analyst / Azure Data Engineer Freelance (Remote, U.S. Clients)

Feb 2018 — Present

- Gather and analyze business requirements, defining the data sourcing and data-flow design behind functional and technical specifications.
- Perform exploratory data analysis in Python — Pandas, NumPy, Matplotlib, Seaborn, SQLdf, and Plotly — translating raw data into business insight.
- Process large volumes of data using PySpark, and manage source control through Git, Bitbucket, and Azure DevOps.
- Write advanced T-SQL, PL/SQL, and PL/pgSQL — CTEs, pivot clauses, window functions, and correlated subqueries — for efficient, rule-driven data loads.
- Model Power BI data on star and snowflake schemas; apply DAX aggregation, logical, text, and date functions, and implement row-level security.
- Develop, publish, and schedule Power BI reports, dashboards, and KPI scorecards as required by each business engagement.
- Design and orchestrate ETL/ELT pipelines with Azure Data Factory and Synapse Pipelines, automate SSIS packages via SQL Server Agent, and process large-scale datasets with Azure Databricks.

Senior Fraud Analyst

Mar 2021 — Present

Ethio Telecom, Ethiopia

- Lead fraud-related projects and act as technical consultant for GSM, Mobile Money, and international spam fraud investigations.
- Detect and monitor fraud via automated SQL queries and Power BI dashboards; configure alerts, patterns, and rating plans within the Fraud Management System (FMS).
- Define FMS user requirements, support UAT, and prepare security requirements for system upgrades; compile monthly/quarterly risk reports.
- Identify and implement best-fit tools for fraud detection and investigation, and provide ongoing support to internal and external stakeholders.

ADDITIONAL EXPERIENCE

Customer Profile Management — Ethio Telecom

May 2019 — Feb 2021

Contact Center Advisor — Ethio Telecom

Jan 2016 — May 2019

Lecturer — Mizan Tepi University

Jun 2015 — Dec 2015

EDUCATION

MSc, Computer Science

Bahir Dar University — 2019–2021

CGPA 3.86 · Great Distinction · Rank #1

Published: "Analysis of Grey-hole Attack on the Performance and Energy Consumption of TCP Variants in Mobile Ad-hoc Network"

BSc, Computer Science

Hawassa University — 2011–2015

CGPA 3.85 · Great Distinction · Rank #1
